

On Monday 29 September, contractor HEB Smithbridge Ltd began realigning and widening the westbound lanes at the approach to the intersection of Great North Rd and Edsel St to create a new bus lane and improve traffic flow through the town centre.

The work is confined to Great North Rd between Montel Ave and Edsel Street and along Edsel Street (see map).

The work is due to be completed by the end of November.

During the construction period the parking area inside the Henderson Primary School grounds will be closed and pedestrian traffic will be diverted to the opposite sides of the road (see map).

Please note, the left-hand turning lane, from Great North Rd into Edsel St, will be closed for part of Tuesday 28 October while the road is widened and new services (water and fibre optic) are installed across the turning lane and intersection. This work is planned after hours and during quiet traffic periods.

If you have any questions relating to the construction work, please contact:
