

## ECOSOURCING PLANT COLLECTION INFORMATION & TEMPLATE

This cover sheet can be used for a one-off collection or as a description of the area for multiple collections. However do fill in a separate form for each distinct collection site.

Once completed this form will also contain the information useful to share with the local iwi or hapu.

The area I wish to collect in is bounded by:.....  
(landscape features that define the area).

It is best described as (name, if applicable) .....

The natural boundaries apparent in the area are defined by:

<b>Catchments</b> (name or number them as per highlighted areas on your map)	<b>Vegetation Remnants</b> (Name or number them as per highlighted areas on your map)	<b>Climatic influences</b> e.g. rain shadow, wind blown, sheltered, high moisture.....(name or number them as per highlighted areas on your map)
1.....	1 .....	1 .....
2 .....	2 .....	2 .....
3 .....	3.....	3.....
4 .....	4 .....	4 .....
5 .....	5 .....	5.....

<b>Habitat</b> e.g. wetland, riparian, cliff/rock, coastal salt, etc (name or number as per highlighted areas on your map)	<b>Substrate</b> e.g. alluvial, volcanic etc.... (name or number as per highlighted areas on your map)	<b>Other</b> (name or number as per highlighted areas on your map)
1.....	1 .....	1 .....
2 .....	2 .....	2 .....
3 .....	3.....	3.....
4 .....	4 .....	4 .....
5 .....	5 .....	5.....

The ecological District(s) this is part of is:

<b>Districts</b>	<b>Regions</b>
1.....	1 .....
2 .....	2 .....
3 .....	3.....
4 .....	
5 .....	

**Species we wish to collect include:**

**Quantities (in portions of a bread bag):**

--	--

I/we intend to use these natural boundaries as we perceive them during our collecting to organise our seed collection and information record for the purposes of producing ecosourced stock as per the Ecosourcing Code of Practice.

The intended use of the collected material is: commercial; community project; personal; research; Other (Circle one or specify other).

Signed.....

Name.....Date .....

# FIELD INFORMATION OF SEED COLLECTION

Batch No:

Collectors Name: .....

Date of Collection:.....

Field name of species:.....

Confirmed name: .....

Location: .....

Iwi/Hapu rohe:.....

Definition of area:.....

Catchment: .....

Topographical situation: alpine, upland, foothills, lowland, coastal harbour, coastal sea, other.....

Climatic influence(s): rain shadow/dry, moist, sheltered, exposed, other.....

Habitat - wetland, riparian, grassland, cliff/rock, coastal, other.....

Substrate: sand, alluvial, clay, volcanic, other.....

Vegetation remnant NO YES - name .....

Ecol District: .....

Ecol Region: .....

Other features or description: .....

(town, address, landscape feature)

.....

.....

Abundance - dominant, abundant, frequent, occasional, rare

No. of plants collected from .....

Volume of seed collected (by portions of a bread bag).....

Observations of interest (plants, wildlife, etc.)

The seeds and information being collected are part of an ecosourcing operation and both will be managed in accordance with the Ecosourcing Code of Practice.

**IWI RELATIONS TEMPLATE**

It is recommended that you start making contact well in advance of any collection trip. Many iwi people prefer to meet face to face. Take the initiative – arrange a meeting, say ‘hello’ – “tena koe” if you are meeting one person; “tena korua” for two people; and “tena kotou” for several people.

The area I wish to collect in is best described as .....

The landscape features that define it are: .....

.....

The iwi/hapu who have mana whenua in this area are (there may be more than one):

Name of Iwi/Hapu: ..... Area bounded by:

Contact name: .....

Contact details: Phone: .....

email: .....

Address: .....

.....

Name of Iwi/Hapu: ..... Area bounded by:

Contact name: .....
