### Art and Ecology Combine in PTS Programme

Recently, Project Twin Streams unveiled another school mural at Western Heights Primary. A collaborative project between sister schools Western Heights and St Dominic's College, the mural focuses on the creatures found in and around the local Opanuku Stream.

St Dominic's art students painted the mural background (a landscape of the Opanuku stream) while Western Heights students worked with Project Twin Streams art coordinators Janet Holt and Mandy Patmore to paint bubbles filled with stream life for the foreground.

A great example of Project Twin Streams working in partnership with local schools and other groups, the mural hangs at Western Heights School and can be admired from Sturges Road.

### Art On The Beach Shines A Light on Sustainability

Hundreds of people turned out for this year's Art on the Beach spectacular at Piha on Saturday March 14. Over 200 children and their parents walked the beach with handmade lanterns before sitting down for a magical laser light show with an ocean sustainability theme, featuring fishermen on stilts, puppetry and dance.

Lopdell House organized the lanterns and laser show and put on a free children's lantern making workshop, while Piha's West Coast Gallery team made the big shark and the tuna.

The exhibition comprises selected works from 12 series of prints, covering silkscreen, intaglio, etching and aquatint, stone lithography and relief printing.

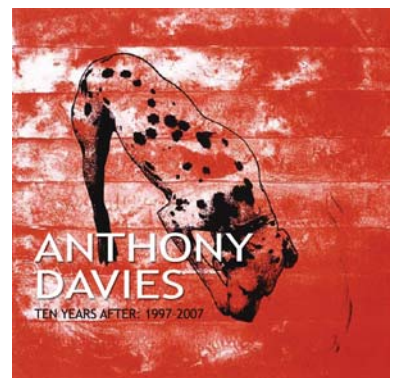

Davies' works reveal his first perceptions of a new country and human interaction with the land, but there is no sense of tourist admiration. Rather, the artists' coolly observant eye picks up on the darker aspects of his surroundings, both physical and psychological.
