

Dear Business Owner,

This is to inform you about works planned for the Great North Road Bridge crossing Oratia Stream over the next 3 months. The Oratia Stream Bridge will undergo an exciting artistic transformation as part of the Mainstreet Upgrade of Henderson. Local Sculptor/Jeweller Jason Hall's design will make the existing bridge into an attractive gateway to the Henderson shopping area.

Construction is programmed to commence on 11 May 2009 and expected to be completed by mid July 2009.

Nasey Contractors Ltd will construct on one side of the bridge at a time. This means that disruptions will be kept to a minimum.

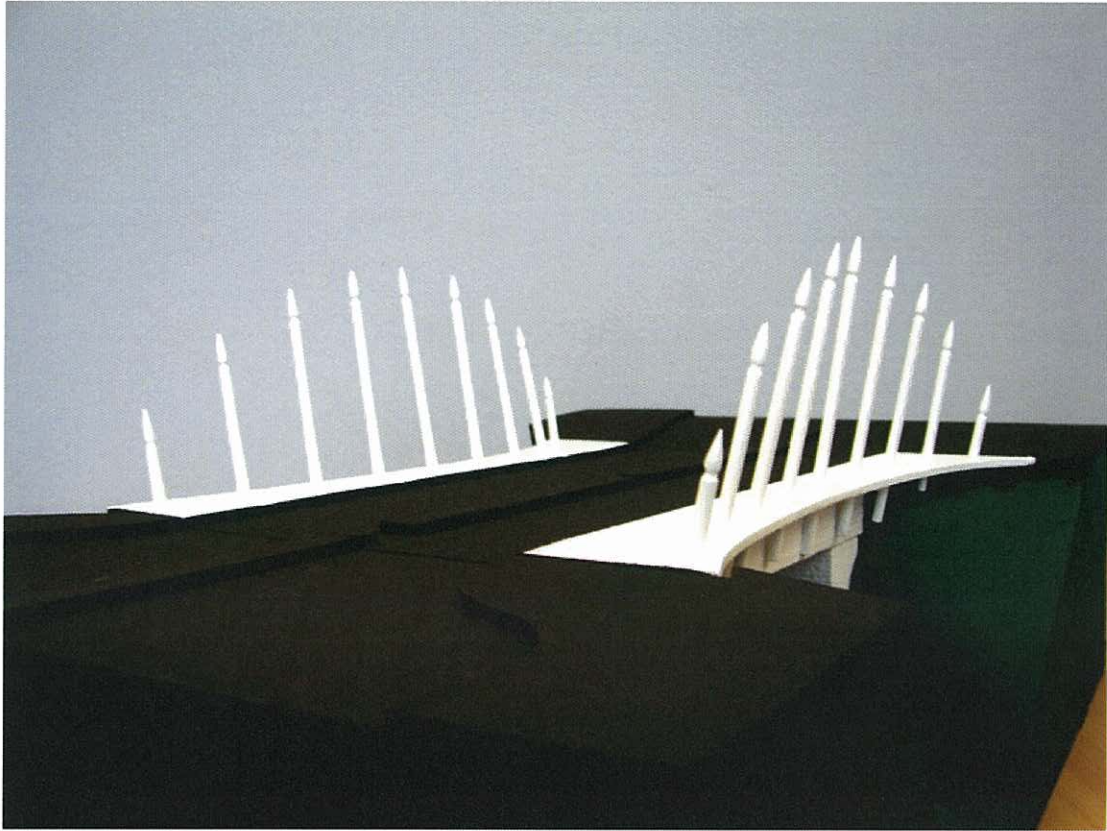

The Contractor will commence work on the northern side of the bridge and will close the footpath and one lane of traffic while construction is in progress. Once the northern side is completed, the Contractor will start work on the southern side of the bridge. The northern side will re-open and the Southern side will then close.

The contractors intend to close the road completely only at the end of the work on each side when the specially designed light poles are lifted into place. This should take about a day per side - one day at the end of works on the northern side and one day at the end of works on the southern side.

The Council is working with the Contractor to minimise disruptions and also maintain safety for both the public and the Contractor. We will work to make sure you know what is happening as the project progresses and try to keep you informed in a timely manner of any possible disruptions.
