

# WATER USE ACTIVITY FOUR

1. Study the pie graph then arrange this list so it goes from the highest area of water use to the lowest.

Bathroom      Kitchen      Laundry      Outdoors      Toilet

2. On average, one person uses 60 cubic metres of water a year. Here is 60 cubic metres of water arranged in different stacks. Beside each stack, write in the area around the house where this water may have been used. (Bathroom, Kitchen, Laundry, Outdoors, Toilet)
