Reserves Management Plan

The purpose of a Management Plan is to:

“provide for and ensure the use, enjoyment, protection and preservation, as the case may require, and to the extent that the administering body’s resources permit, the development, as appropriate, of the Reserve for the purposes for which it was classified.”

This document is a Management Plan for the fourteen reserves within Waitakere City, which lie adjacent to the Henderson Creek, and the lower reaches of the Opanuku and Oratia Streams. This Plan is intended as a guide for the future protection, use and development of these reserves. The Plan regards the reserves in combination as part of an integrated natural system but also responds to their individual management.

The project team is appreciative of the input from all who contributed to the consultation process undertaken in the preparation of this Plan.
